

# WHY CHOOSE V-AIR<sup>®</sup>SOLID EVOLUTION?

PATENTED  
TECHNOLOGY

SCIENCE MADE SIMPLE.

# VECTAIR

V-AIR® EVOLUTION SOLID MULTI-PHASING REFILLS

# VS

# OTHER

'PASSIVE' & LIQUID BASED CARTRIDGES

## NO BATTERIES

contained in the refill or required in the dispenser – just pure, natural airflow.

## NO LIQUIDS

no chance of leaking in transit or in use.

## RECYCLABLE & ORGANIC CENTRAL CORE

Fully recyclable refill with an organic central core made from carrageenan (seaweed).

## FRAGRANCES LAST UP TO 60 DAYS

or more. Unaffected by climatic conditions.

## MULTI-PHASING FRAGRANCE TECHNOLOGY

– the release at different rates of a complementary base fragrance over the life cycle of the refill eliminates fragrance fatigue.

## REFILL IS VOC EXEMPT.

with a fully recyclable dispenser, solid outer capsule and fragrance core.

## INDUSTRY FIRST. UNIQUE TECHNOLOGY.

The patented technology originally “invented” by Vectair & wholly unique to us.

V-Air® SOLID Evolution Multi-Phasing  
**REFILLS FIT INTO AND WORK IN MOST  
SIMILAR**, competing passive dispensers as  
well as the dedicated 100% recyclable V-Air®  
SOLID Dispensers.

V-Air® SOLID Evolution utilizes pioneering  
**SUB-MICRON FRAGRANCE TECHNOLOGY**  
– fragrance particles are sized below 1.0  
micron enabling superior fragrance delivery  
remaining airborne for many hours.

**CARBON FOOTPRINT LTD. APPROVED**  
certified as carbon neutral. Cash donation  
made by Vectair to offset carbon made to  
environmental good causes worldwide.

Some passive refills  
**CONTAIN “HYDROGEN FUEL CELLS”**  
these are batteries used in toys and watches.

**LIQUID BASED REFILLS HAZARD**  
of spillages possible in transit and leakages in use.

Certain liquid based refills are hazardous and  
**CONTAIN NON-RECYCLABLE & NON-ORGANIC  
PARTS.** Restrictions in place on transport.

Fragrance ‘claim’ to last up to 60 days  
but can be **AFFECTED BY  
CLIMATIC CONDITIONS.**

**ONLY ONE FRAGRANCE PER REFILL.**  
Fragrance fatigue cannot be avoided.  
This leads to complaints that the  
product is not effective.

Many products are only VOC  
compliant or claim ‘low VOCs’, not the  
desirable VOC exemption.

Existing liquid based refills – the  
**MARKET IS SATURATED WITH MANY  
SIMILAR PRODUCTS.**

Some liquid based refill cartridges  
**WILL NOT FIT INTO OTHER DISPENSERS**  
requiring the additional investment and  
installation of new dispensing cabinets.

Larger, heavier fragrance particles reduce “hang  
time” and fragrance delivery.  
Non-patented technology.  
**LOW FRAGRANCE IMPACT.**

Expired, ‘old’ claims or  
**NO CARBON FOOTPRINT APPROVAL.**
